

# Four Way Fin System

INTERNATIONALLY PATENTED

Adjust - and fast 4ward your surfing!

## INTERDISC

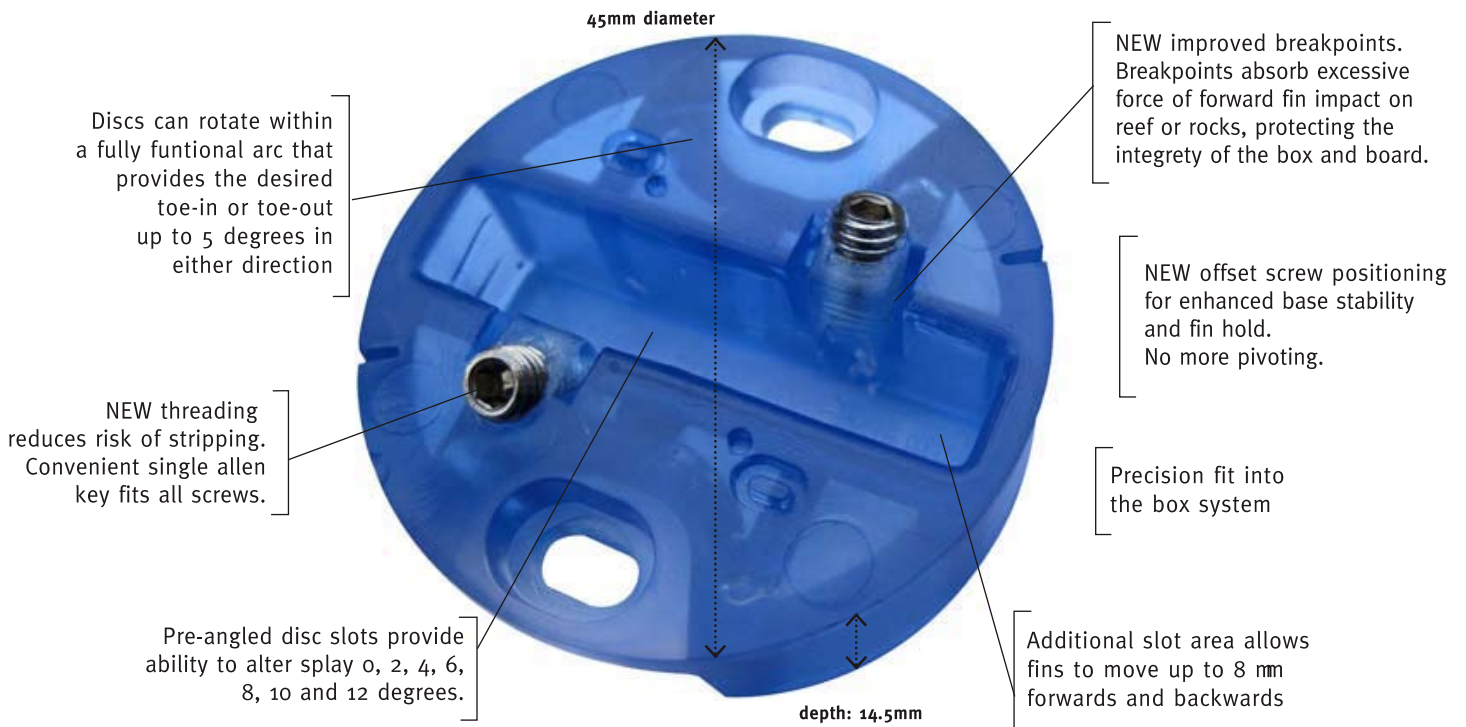

- 1. Horizontal Realignment
- 2. Outward and Inward Splay
- 3. Toe-In and Toe-Out
- 4. Fin Replacement

## 4WFS - Interdisc

The interdisc is the most pivotal component of 4WFS. The fully patented design allows each disc to be rotated up to 5 degrees in either direction, facilitates adjustments to fin splay and also provides for horizontal finrealignment. Please note that now 0, 2, 4, 6, 8, 10 and 12 degrees are possible depending on which disc you use.

Furthermore our patented system allows for each fin to break out from the supporting interdisc on severe frontal impact without damaging either the embedded box or fin. Replacement interdiscs are one of the most affordable components of the 4WFS range of products.

0 degree interdisc

2 degree interdisc

4 degree interdisc

6 degree interdisc
