INTERNATIONALLY PATENTED

FOUR WAY FIN SYSTEM: the worlds #1 selling fully adjustable fin system

New additions to our fibreglass range

The 4KS is a mini series with a striking bold stand alone design. All 4 fins are designed to work harmoniously together and will form a very distinctive look.

4KS1

Designed for young, lightweight surfers. The 4KS1 is a small upright fin for boards up to 5.10". It has a small base, which allows tight and snappy turns with the freedom young surfers need to develop their moves. You can use the 4KS1 centre fin with other side fin combinations to loosen up your board or use the sidefins as trailing fins in a quad set up.

4KS2

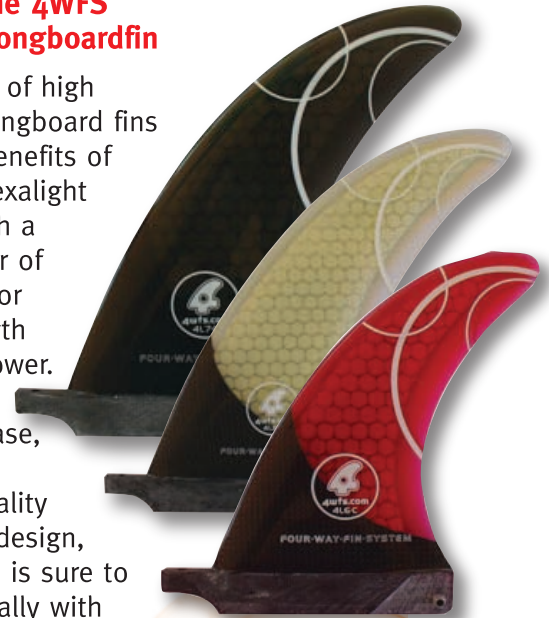

The 4KS2's are an ideal mid-range fin and is ideal for fast high performance tight pocket surfing in gutsy hollow waves. As with the 4KS3, the thruster set comes together with the smaller 4KSC centre fin which has been designed to add a little bit of extra looseness to the overall setup.

4KS3

This is a large fin template, best suited for solid down the line walls and long turns where hold is critical. The thruster set comes together with the smaller 4KSC centre fin which has been designed to add a little bit of extra looseness to the overall setup.

Introducing the 4WFS Hex-Carbon Longboardfin

Our new range of high performance longboard fins combine the benefits of lightweight hexalight technology with a integrated layer of Carbonweave for superior strength and holding power. Fitted with a standard US-base, but with our exceptional quality and high tech design, the 4LBx range is sure to impress especially with high tech SUP's and high performance longboards. Currently 6, 7 and 8 inch sizes are available in the colouring as pictured.
