4WFS - GFK-CNC Fibreglass foils [very low flex]

4WFS - GFK Fibreglass fins are precision manufactured using the latest computer generated CNC technology. Our fibreglass fins use only the best materials and associated resins to produce a superbly finished low flex and high strength foil that is ideal in all surf conditions, but really comes into its own in larger more powerful surf where holding power and drive are critical. Also a firm favourite with tow, kite and other extreme boards.

X-Small: up to 80 cm² • Small: 80-92cm² [40-65kg] • Medium: 93-97 cm² [60-80kg] • Large: 98-105 cm² [75+kg] • X-Large: 106cm²+

4FK1•G mini bonzer

Base length:
100mm 3.94"
Fin Depth:
48mm 1.89"
Sweep:
37°
Surface area:
30.03cm² 11.82in²

The unique design of this foil with its relatively long base reduced rake and low height allows it to be used in a variety of configurations. This includes as a small side bite in quads or on its own for those speciality boards requiring less drive but increased turning ability.

4XT1C•G / 4Q2•G X-small

Base length:
83mm 3.27"
Fin Depth:
77mm 3.03"
Sweep:
29°
Surface area:
49.65 cm² 19.55in²

The versatile properties of this foil lends itself to being a superb centre fin stabilizer in either twin or 5 set-ups. It can equally be used as a symmetrical rear fin in quad configurations. This foil is also available as an asymmetrical side fin with a 90/10 inside foil.

4Q1•G X-small

Base length:
97mm 3.82"
Fin Depth:
92mm 3.62"
Sweep:
32.5°
Surface area:
61.99cm² 24.40in²

The 4Q1 sits comfortably in size between the small 4Q2 and the larger 4K/LB. It also possesses a 90/10 inside concave foil as well as a subtle progressive twist. Ideal as a larger quad side bite.

4K•G X-small

Base length:
100mm 3.94"
Fin Depth:
105mm 4.13"
Sweep:
31.5°
Surface area:
73.14cm² 28.79in²

The 4K fin has been designed with lightweight surfers in mind. It provides lighter surfers with a well balanced combination of drive and manoeuvrability. The 2 sidefins on their own are also known as the 4LB's which are ideal as longboard sidetrailers.

4KS1•G small

Base length:
104mm 4 1/8"
Fin Depth:
108mm 4 1/4"
Sweep:
32.4°
Surface area:
81.58cm² 12 3/4in²

Designed for young, lightweight surfers. The 4KS1 is a small upright fin for boards up to 510". The small base allows tight and snappy turns. You can use the 4KS1 centre fin with other side fin combinations to loosen up your board or use the sidefins as trailing fins in a quad set up. (Please see also the 4KS2 and 4KS3)

4A•G small

Base length:
109mm 4.29"
Fin Depth:
115mm 4.53"
Sweep:
32°
Surface area:
90.99cm² 35.49in²

This is our most popular allround fin and is a firm favourite for the medium to lightweight surfer. It offers a traditional extended rake profile providing both a smooth release through turns as well as a d just when you need it.

4A5•G small

Base length:
110mm 4.33"
Fin Depth:
115mm 4.53"
Sweep:
32°
Surface area:
91.96 cm² 35.86in²

The 4A5 is another of our most popular templates as its a great all round performer for those surfers in the target weight range. It works well in almost any board.

4KS2•G medium

SIDES:
Base length:
110mm 4.45"
Fin Depth:
115mm 4.53"
Sweep:
32°
Surface area:
98.24cm² 15in²

The 4KS2 is an ideal mid-range fin with a more upright trailing edge. Ideal for fast high performance tight pocket surfing in gutsy hollow waves. The thruster set features a smaller centre fin to add extra looseness to the overall setup.

8 INSIDE FOIL: Inside foil technology really comes to its own in a modern high performance fin as it reduces water flow distortion (drag) and improves hold and speed, making for a smoother more powerful ride.

★ KITESURFING: These foils are recommended for use in directional kite-surfboards. Note that high density installation blocks should be pre-installed to provide additional support.

★ NEW FOIL: These are the latest additions to the range.

Q QUADS: Quad configurations can vary greatly depending on personal references. We've indicated some of the more popular choices here for ease of reference.

★ SPECIALITY FOIL: Those fins that are most unique in nature are used in specialist configurations. **⊗ TWISTED FOIL:** Twisted foil fins display a strong upright base with an accentuated splay towards the tip, whilst at the same time harnessing the benefits of a complimentary clean inside foil and progressive inside twist that maximises laminar flow and lift. The result is a foil that seamlessly integrates drive with turning power making for a smooth yet powerful ride.
